

“Dynamics of water resources in Central Asia and their environmental effect”

Bishkek, Kyrgyzstan

26 August – 02 September 2019

(Second Announcement)

Dear Colleagues!

We invite participants from all over the world to attend to the International Conference **“Dynamics of water resources in Central Asia and their environmental effect”**, which will be held in Bishkek city, Kyrgyzstan from 26 August to 02 September 2019.

Organizer: RCEECA Bishkek

Co-organizers:

**Geology Institute of NAS, KR
Xinjiang Institute of Ecology and Geography, CAS
Institute of Water Problems and Hydropower of NAS KR
Ural State Mining University, Russia**

The objectives of the international conference are following:

- Discussion devoted to actual problems of sustainable using and forecasting of water resources dynamics in conditions of the current climate change.
- Exchanging experience in investigation of the glaciers dynamics and effect of glaciers shrinkage on the water resources regime of Central Asia.
- Discussion devoted to biodiversity conservation status in Central Asia and adaptations of animal and plant species to the current climate change.
- Development of practical measures for assessing water resources in conditions of the current climate change, introducing modern methods and innovative technologies for studying of water resources.

Target Audience:

1. Water resources and water management;
2. Glacier dynamics;
3. New technologies for water use and their introduction for green development;
4. Changes in arid ecosystems and their monitoring
5. Current problems of biodiversity.

PLANNED FIELD TRIPS AFTER THE CONFERENCE ARE FOLLOWING:

- Bishkek-Karakol – 4-5 days (Issyk-Kul province) 100 \$ per person per day
